

System Requirements IEES

To use G.PRO Enterprise Solution (GES) IEES, you will need:

Component	Server	Client
Computer and Processor	Server with Intel Pentium 4 2.8 GHz processor; dual processor or higher	Intel Pentium 4 1.8 GHz processor or higher
Operating System	Microsoft Windows Server 2003 (SP2) with SQL Server 2005 Standard Edition or higher or Microsoft Windows XP Professional (SP2) with SQL Server 2005 Standard Edition or higher	Microsoft Windows XP Professional SP2
Memory	2 GB RAM or higher	512 MB RAM or higher
Disk Space	250 MB	100 MB
Monitor	1024 x 768 or higher resolution monitor 17-inch or higher	1024 x 768 or higher resolution monitor 17-inch or higher
Disk Drive	CD-ROM drive	CD-ROM drive
Pointing Device	Microsoft Mouse or compatible device	Microsoft Mouse or compatible device
Network	Yes Configured LAN Internet connection (for software updates and web reporting)	Yes Configured LAN Internet connection (for software updates and web reporting)
Additional	Microsoft SQL Server 2005 Standard/Enterprise Edition Microsoft Internet Information Services	Microsoft Internet Information Services*
Others	-	

For SQL Server 2005 requirements, it is highly recommended that you first check your Microsoft supplied SQL Server 2005 documentation.

Technical Note: The requirements for IIS as a prerequisite on all client machines are subject to change pending a technical review and engineering change request.

Disclaimer

Requirements may need to be adjusted based on site topology, number of users, and machine configurations.

Does not include SQL Server 2005. This applies to installing G.PRO Enterprise Application Framework, GES applications and any additional prerequisites such as the .NET framework 1.1, 2.0. Excludes database size and growth.

The applications in G.PRO Enterprise Solution have been designed to take advantage of larger screen monitors.

A network with domain authentication is recommended for medium to large scale deployments. Workgroups are not recommended for live deployments.

Microsoft Office® 2003 is required on client workstations if you want to transform reports into Microsoft Excel or Rich Text Formats.

Microsoft SQL Server 2005 Enterprise Edition installs only on Windows Server platforms. SQL Server 2005 Standard edition installs on Windows XP Professional or higher.

Microsoft SQL Server 2005 Service Pack 2 (SP2) update is currently not compatible with GES.
