

# GPRO Technologies Bhd

GPRO Technologies Berhad (GPRO) is a leading Malaysian-based technology company that specializes in IT solutions and technologies for the industry, developing in-house software and designing the complementing hardware. For the past ten years, GPRO has been developing solutions for garment manufacturers worldwide to increase their efficiency and productivity.

A firm believer in research and development, GPRO devoted its initial 3 years of development on R&D activities. Established in 1996, GPRO now actively markets products under the “G.PRO” brand, namely the **G.PRO** SDT System and **G.PRO** IEES System - real-time online shopfloor data-collection and feedback management systems.

To date, **G.PRO** products have been installed in over ten countries: China, Indonesia, Brunei, Vietnam, Sri Lanka, Hong Kong, United Arab Emirates, Thailand, Cambodia and Singapore. The company continuously promotes and markets this system among mid to large size garment manufacturers worldwide. Some of its customers include Hong-Kong based Crystal Group and Smart Shirts Ltd, and Nhabe Garment Company from Vietnam.

**G.PRO** products and service quality are one of the best in the region. Some recognition has come in the form of the Industrial Export Excellence Award for Merchandise from the Ministry of International Trade and Industry, Malaysia in 2003. Also, the company obtained a Bronze place for Malaysia’s Emerging Brand Award 2005 and was short listed as a finalist in Red Herring Asia’s Top 100 companies. In 2004, the company made its IPO debut on the Mesdaq market of the Malaysian Stock Exchange.

GPRO has a strong commitment towards technology development. Approximately 50 per cent of its total staff strength is employed in the areas of research, developing new products and enhancing existing systems. The company’s pool of skilled knowledge workers are drawn from various fields including software engineering, communication engineering, electrical engineering, industrial engineering, business administration and marketing.

With the head office in Malaysia, GPRO also has regional offices in Vietnam, Singapore, China and Thailand to help extend customer support throughout the region.

GPRO hopes to establish its products and technologies as the *de facto* industry standard for the international textile and apparel industry.
